## REPORT FROM DERMATOLOGICAL TEST

### 7. METHODS OF RESEARCH

The test was performed in accordance with the research procedure of SKINLAB P.S.A. (PB.01 Dermatological tests) under the supervision of a dermatologist. The research model is the skin test according to Jadassohn-Bloch modified by Rudzki. The test consisted in a single application of the product to a selected area of the skin, and then observing the condition of the skin at intervals. The recording of the results and the classification of the product is made on the basis of the point classification (0-4) of the skin reaction. Qualification, sample application and readings take place at SKINLAB P.S.A. in Cracow.
